Glock 17 installation

First go to the original mod link (go to the top of this description and click the ''Model'' ) it should then redirect you to the original mod and then you can download it from there.

Start up OpenIV and select GTA5 windows edition then navigate to

mods > update > x64 > dlcpacks > patchday10ng > dlc.rpf > x64 > models > cdimages > weapons.rpf

then simply drag and drop the files that are inside of the Model Download made then drag the YTDs of this download into there as well.
